## **BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

## **IMAGES ARE BEST AVAILABLE COPY.**

As rescanning documents *will not* correct images,  
Please do not report the images to the  
Image Problem Mailbox.

Amendments to the Claims:

✓ ✓ ✓  
Please cancel claims 138, 143, and 146, and amend claims 124, 142, 150, 151 and 165. The following listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claims 1-123 (Cancelled).

sub B  
Claim 124 (Currently Amended). A book copying system for copying a book based on electronic image data obtained through a network, comprising:

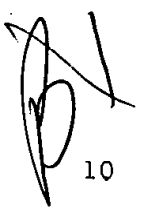

B  
a data service system connected to the network and to supply electronic image data of a book through the network, the data service system having a data storage section in which image data of a plurality of different books are stored and a data managing section to manage the image data; and

10 a print service station connected to the network and installed at a place where the print service station provides print service for a customer, the print service station having a print managing section to input a print order of a customer to print a copy of an ordered book and to communicate with the data

Appln. No. 09/696,114  
Amdt. dated December 23, 2003  
Reply to Office Action of October 1, 2003

service system so as to obtain image data of the ordered book from the data storage section through the network and a print section to print a copy of the ordered book based on the obtained image data;

5        wherein the print service station selectively sets a printing condition in accordance with the print order and sets the print service charge in accordance with the selected printing condition.

 10        wherein after the print service station prints the image data, the print service station determines the print charge in accordance with a print result of the copy of the ordered book, and

 15        wherein the data service system sets a data service charge for the image data of the ordered book, the print service station sets a print service charge for the copy of the ordered book, and the book copying system determines a copy charge of the ordered book based on the data service charge and the print service charge.

Claim 125 (Previously Presented). The book copying system of claim 124, further comprising:

Appln. No. 09/696,114  
Amdt. dated December 23, 2003  
Reply to Office Action of October 1, 2003

a calculating section to calculate the copy charge based on the data service charge and the print service charge.

Claim 126 (Previously Presented). The book copying system of claim 125, wherein the print service station reports a print result of the copy to the calculating section and the calculating section reduces the copy charge in accordance with the printing result of the copy.

Claim 127 (Previously Presented). The book copying system of claim 126, wherein the print service station comprises a copy result detecting section which reports the printing result.

Claim 128 (Previously Presented). The book copying system of claim 126, wherein the printing result includes a notice to indicate successful printing.

Claim 129 (Previously Presented). The book copying system of claim 125, wherein the calculating section conducts a payment charging process in accordance with the calculated copy charge.

Appln. No. 09/696,114  
Amdt. dated December 23, 2003  
Reply to Office Action of October 1, 2003

Claim 130 (Previously Presented). The book copying system of claim 125, wherein when the calculating section is provided in the print service station, the data service system transmits the data service charge through the network to the print service station so that the calculating section calculates the copy charge.

Claim 131 (Previously Presented). The book copying system of claim 125, wherein when the calculating section is provided in the data service system, the print service station transmits the print service charge through the network to the data service system so that the calculating section calculates the copy charge.

Claim 132 (Previously Presented). The book copying system of claim 131, wherein after the print service station prints the copy, the print service station transmits the print service charge through the network to the data service system so that the calculating section calculates the copy charge.

Claim 133 (Previously Presented). The book copying system of claim 124, wherein the data service system sets the data

Appln. No. 09/696,114  
Amdt. dated December 23, 2003  
Reply to Office Action of October 1, 2003

service charge based on at least one of a royalty of a copyright  
on the book, a data conversion fee to convert an original book  
5 into electronic image data and a service charge to transmit the  
image data.

Claim 134 (Previously Presented). The book copying system  
of claim 133, wherein when the copyright on the ordered book is  
terminated, the data service system excludes the royalty of the  
copyright from the data service charge.

Claim 135 (Previously Presented). The book copying system  
of claim 124, wherein the print service station sets the print  
service charge based on at least one of a rental fee for  
materials and a rental fee for a printer which is used for  
5 printing the image data.

Claim 136 (Previously Presented). The book copying system  
of claim 135, wherein before the print service station prints the  
image data, the print service station estimates the copy service  
charge based on at least one of the rental fee for the materials  
5 and the rental fee for the printer which are expected to be used  
for printing the image data.

Appln. No. 09/696,114  
Amdt. dated December 23, 2003  
Reply to Office Action of October 1, 2003

Claim 137 (Previously Presented). The book copying system of claim 135, wherein after the print service station printed the image data, the print service station sets the copy service charge based on at least one of the rental fee for the materials and the rental fee for the printer which were used for printing the image data.

Claim 138 (Cancelled).

Claim 139 (Previously Presented). The book copying system of claim 135, wherein the print service station comprises a plurality of printers and sets the print service charge for each of the plurality of printers.

Claim 140 (Previously Presented). The book copying system of claim 124, wherein at least one of the data service charge and the print service charge is encrypted.

Claim 141 (Previously Presented). The book copying system of claim 140, wherein at least one of the data service charge and

Appln. No. 09/696,114  
Amdt. dated December 23, 2003  
Reply to Office Action of October 1, 2003

The print service charge is provided with a digital signature encrypted with a cryptography key.

Claim 142 (Currently Amended). A book copying system for copying a book based on electronic image data obtained through a network, comprising:

5 a data service system connected to the network which supplies electronic image data of a book through the network, the data service system having a data storage section in which image data of a plurality of different books are stored and a data managing section to manage the image data; and

10 a print service station connected to the network and installed at a place where the print service station provides print service for a customer, the print service station having a print managing section to input a print specification of a customer to print an ordered book and to communicate the data managing section so as to obtain image data of the ordered book  
15 from the data storage section through the network and a print section to print a copy of the ordered book based on the image data;

Appln. No. 09/696,114  
Amdt. dated December 23, 2003  
Reply to Office Action of October 1, 2003

wherein at least one of the data service system and the  
print service station comprises a data processing section to  
20 compile the image data in accordance with the print specification  
of the customer, the print service station controls a printing  
condition to print the compiled image data by the print section  
in accordance with the print specification, and the book copying  
system determines a copy charge of the ordered book based on the  
25 print specification,

wherein the print service station sets an estimated copy  
charge in accordance with the print specification and indicates  
the estimated copy charge for the customer, and

wherein when the customer agrees to the estimated the copy  
30 charge, the print service station sends an order signal to the  
data service system.

✓ Claim 143 (Cancelled).

Claim 144 (Previously Presented). The book copying system  
of claim 142, wherein the data service system transmits an  
estimated data service charge to the print service station and  
the print service station sets the estimated copy charge based on  
5 the estimated data service charge.

Appln. No. 09/696,114  
Amdt. dated December 23, 2003  
Reply to Office Action of October 1, 2003

5 Claim 145 (Previously Presented). The book copying system of claim 144, wherein the data service system transmits the estimated data service charge together with a period of validity and when the period of validity has expired, the data service system makes the estimated data service charge invalid.

✓ Claim 146 (Cancelled).

pt Claim 147 (Previously Presented). The book copying system of claim 142, wherein the data service system transmits job ID information to the print service station.

C Claim 148 (Previously Presented). The book copying system of claim 147, wherein when the customer agrees to an estimated copy charge and sends an order signal, the data service system transmits job ID information to the print service station.

Claim 149 (Previously Presented). The book copying system of claim 147, wherein the data storage section specifies image data and the print service station to be sent the image data on the basis of the job ID information.

Appln. No. 09/696,114  
Amdt. dated December 23, 2003  
Reply to Office Action of October 1, 2003.

Claim 150 (Currently Amended). The book copying system of claim 149, wherein the data storage section collates the job ID information sent ~~from~~ to the print service station with the job ID information transmitted from the data managing section and  
5 specifies the print service station to which the image data will be sent.

*Bx*  
Claim 151 (Currently Amended). The book copying system of claim 149, wherein the data storage section forwards the job ID information sent ~~from~~ to the print service station to the data managing section and the data managing section collates the job  
5 ID information with the job ID information forwarded from the data storage section and specifies the print service station to which the image data will be sent.  
*CI*

Claim 152 (Previously Presented). The book copying system of claim 151, wherein the data managing section transmits a data storing location to the print service station in response to the order signal.

Appln. No. 09/696,114  
Amdt. dated December 23, 2003  
Reply to Office Action of October 1, 2003

5 Claim 153 (Previously Presented). The book copying system  
of claim 152, wherein the print service station accesses the data  
storage section on the basis of the obtained data storing  
location and sends the print specification to the data storage  
section.

Claim 154 (Previously Presented). The book copying system  
of claim 153, wherein the data storage section includes the data  
processing section which compiles the image data on the basis of  
the print specification.

Claim 155 (Previously Presented). The book copying system  
of claim 153, wherein the print specification includes a print  
mode and the data processing section compiles a page arrangement  
in accordance with the print mode.

Claim 156 (Previously Presented). The book copying system  
of claim 155, wherein the print mode includes a page-unit print  
and a book-unit print.

Claim 157 (Previously Presented). The book copying system  
of claim 153, wherein the data storage section encrypts the image

Appln. No. 09/696,114  
Amdt. dated December 23, 2003  
Reply to Office Action of October 1, 2003

data and the print service station decrypts the encrypted data and conducts the printing on the basis of the decrypted data.

Claim 158 (Previously Presented). The book copying system of claim 157, wherein the print service station conducts a trial printing before the printing.

 Claim 159 (Previously Presented). The book copying system of claim 153, wherein the print managing section of the print service station requests the print section to conduct the printing after obtaining the image data from the data storing location.

 Claim 160 (Previously Presented). The book copying system of claim 159, wherein the print service station reports a print result of the copy and the book copying system adjusts the copy charge in accordance with the printing result of the copy.

Claim 161 (Previously Presented). The book copying system of claim 160, wherein the book copying system conducts a payment charging processing on the basis of the printing result.

Appln. No. 09/696,114  
Amdt. dated December 23, 2003  
Reply to Office Action of October 1, 2003

Claim 162 (Previously Presented). The book copying system of claim 160, wherein at least one of the estimated copy charge and the printing result is provided with a digital signature by a public key cryptograph method.

Claim 163 (Previously Presented). The book copying system of claim 142, wherein when the print service station requests a log-in for the data service system, the data service system certifies the request of log-in of the print service station.

Claim 164 (Previously Presented). The book copying system of claim 163, wherein the print service station is provided with a cryptograph key for each client and when the print service station accesses the data service system, the print service station makes a digital signature encrypted by the cryptograph key.

Claim 165 (Currently Amended). The book copying system of claim 163, wherein when the ~~printer client system~~ print service station accesses the service system, the ~~printer client system~~ print service station makes a digital signature by a public key cryptograph method.
